at NHHEAF Network, 4 Barrell Court, Concord, NH**

**DESCRIPTION OF THE PRESENTATION:** The work of substance abuse prevention is an ever evolving field that includes science, best practices and evidence-based strategies. This one-day workshop is designed for those in the field of prevention who either are new, returning or needing more information on current prevention. In this workshop, we will explore the Strategic Prevention Framework (SPF) which is a public health planning approach designed to help States and communities identify needs, and build the infrastructure for effective, sustainable substance abuse prevention services. We will utilize interactive and content filled activities to learn about the five major steps of the SPF. We will also include information on sustainability and cultural competency and how these impact the process of SPF. Along with this overview, we will also focus on the work of SPF that is happening throughout New Hampshire. By the end of this training, participants will have: explored 5 Steps of CSAP's Strategic Prevention Framework Model; examined cultural competence and sustainability, understood the role of environmental strategies in prevention; and learned how SPF is being implemented in New Hampshire.
